

Re-Setting Algorithm for El Con Charger

1. Loosen charger from rear seat facing backwards by removing the two small screws on the passenger side, and loosening the two on the driver side.
2. On bottom side of charger, driver side, look for black sticker that says '48 VOLT'. Remove to expose black button.
3. Press and hold button and connect car to the AC outlet (plug in car) Keep finger on button.
4. LED on charger will flash....when it flashes 6 times, remove finger from the button.
5. Disconnect AC Power – remount charger to finish procedure.
